

Low-Carbon Planning

A **free** one-day workshop for community groups, individuals, councillors and planners with an interest in local planning and low-carbon development. Pre-booking is essential

Date: Saturday 8 October 2011

Time: 9.30am to 5.30pm (registration from 9am)

Location: County Hall, Matlock

One of a series of four **free** one-day training events being held in the East Midlands.

The events are aimed at helping community groups, individuals and councillors engage with local planning and low-carbon development – and help them to understand how they can generate local energy.

Beginning with a keynote speaker, the event will also use a range of participatory sessions. It will also feature the **PlanLoCaL model**, a large-scale model of a town demonstrating how renewable energy technologies work, and the **PlanLoCaL films**, which include case studies and information on how to set up renewable energy projects.

The morning will focus on how communities can get involved in local plan making, with the

afternoon looking at renewable energy technologies, climate change adaptation, community engagement, and funding issues.

To confirm your place, email your name, job title (if relevant), organisation, contact email address and phone number to kirsty.mitchell@cse.org.uk. Also state any special dietary or access requirements, and the above location. Please note that pre-booking is essential.

One of the workshop sessions will concentrate on renewable energy technologies, so please state your first and second choices of technology and we will focus on the most relevant.

If you are unable to attend for any reason, please contact us as soon as possible so we are able to offer your place to someone else.

Funded by Groundwork East Midlands, these workshops are run by the Centre for Sustainable Energy in association with Marches Energy Agency
